Subject: Chemical analyses of Multi-Plate samples - EPA Approval
Date: 12/01/2005 10:40 AM

EPA has received the proposal for the analysis of Multi-Plate samples. This proposal was developed through discussions between LWG and EPA project team members and was submitted on your behalf by Helle Anderson on November 17, 2005. The proposal reflects what was agreed upon and is approved. The proposal includes a footnote that the extract for PCB and DDT analyses can also be used for dioxin and furan analysis. EPA requests that all samples also be analyzed for dioxin and furans.

If you have any questions about this matter, please do not hesitate to contact me.

Thanks, Eric
